YOUR DATA EXPLAINED

Performance in the most recent event

Single Lap Performance (%)

This score is relative to other drivers in your class and shows your best lap time to the fastest lap time overall. Qualifying has the highest weighting, then the races, and then practice. A 100% score means you set the fastest lap in every session.

Race Performance (%)

This score is also relative to other drivers in your class and shows your race position compared to 1st position. A 100% score means you finished 1st in every race. Practice and qualifying are not counted.

Best Lap Comparison

These are the best lap times set in all sessions. This shows how your ultimate pace compared to the field.

Blue = Your best lap time

Grey = Other drivers' best lap time

Race Average Lap Time

This shows you how consistent you are compared to the field. These are your average lap times from the Pre-Final and Final only.

Blue = Your average lap time

Grey = Other drivers' average lap time

Performance in past events

Gap to Fastest in past events

The gap (in seconds) between your best lap time and the field over time. If you set your fastest lap in the race, it'll show you the gap in previous races so you can check if you're progressing.

Position on Best Lap in past events

This shows what race position you were in at the time of setting your fastest lap time.

The position may land on a half-measure if you changed position during your fastest lap.

Single Lap Performance in past events

This shows your Single Lap Performance as a percentage over time as you progress through the championship. This is relative to other drivers in your class.

Race Performance in past events

This shows your Race Performance as a percentage over time as you progress through the championship. This is relative to other drivers in your class.
